FOR IMMEDIATE RELEASE

Haverhill, Massachusetts (January 13, 2011) Adamson Industries Corp., a leading provider of public safety vehicle equipment and installation services, introduces the Inductor Max3, a high performance induction heater. Using high frequency magnetic fields, easily remove parts bonded to metal in a fraction of the time or heat bolts red hot without the collateral damage normally associated with conventional heating methods.

Benefits and features of the Inductor Max3: Operates at a convenient 120 volts, UL/CSA listed GFI for user safety, tug resistant in-line connector, pneumatic foot switch, heats aluminum and steel, audible and visible power indicators. The Inductor Max3 includes 3 universal series attachments that are ergonomically designed and molded in High Temp, impact resistant epoxy polymers. Attachments include the Fast-Off pad, a heat resistant outer material that is softer on paint and more durable than fiberglass. Uses include removal of moldings, graphics and emblems. The Glass Blaster high mount, molded in strain relief, keeps cord from interfering with adjacent panels. Uses include glass, appliqués, bonded SMC panels, metal bond adhesives and spray-on bed liners. The Concentrator tapered body, beveled edges and compact designs allow this attachment to get into tighter areas. Uses include release seized hardware, thread lock compounds, caulking, soft dents and metal shrinking.

Pricing and Availability

The Inductor Max 3 is available for \$1498.95 at www.adamsonindustries.com or call toll free 800.232.0162. Each Inductor Max3 comes with the three attachments neatly stored in a convenient carrying case, which all together weighs 22 pounds.
